## GEAR FITTING EXPERTS

**We are proud to work with Leon's Canine Heroes Events –  
Leon's Canine Triathlon & Leon's Canine Obstacle Course Race!**

With nearly a decade of properly fitting active – athletic dogs of every breed, size and shape for their event(s), we are ready to make sure your dog and you have the properly fitting gear.

Dog harnesses are a lot like "shoes"!!!! You do not wear the same pair of shoes for every activity in your life and having a harness that is best suited for the activity for your dog should be seen the same way. Your dog's build and the activity will dictate the style and fit of the harness. Not all harnesses are built the same or even designed for some of the activities you maybe doing together.

A properly fitted harness will lead to a healthier workout partner and better performance. Your partner cannot tell you the straps are too tight, too narrow, putting pressure in uncomfortable or damaging ways, etc. We can assist in this process. If you are running, bikejoring, obstacle course racing, and active in other areas, we have the gear for your dog.

For you, the human in the activity, having a properly fitted belt that fits around your hips and allows you to be properly pulled is critical for you and your partner. The bungee that connects you to the partner, should be with an ideally fitted belt that causes you no discomfort and maximizes the efforts of your partner and you.

We are able to properly fit you in person by making an appointment or assisting/walking you through the process over the phone and utilizing email to send pictures, etc. to get a better idea of the size, shape, etc. of your dog.
